Brand Colors

Main Color

Our main color is orange because it embodies creativity, enthusiasm, and energy. Orange is a vibrant and eye-catching color that reflects the agency's dynamic and innovative approach to web and graphic design, helping them stand out and make a memorable impact.

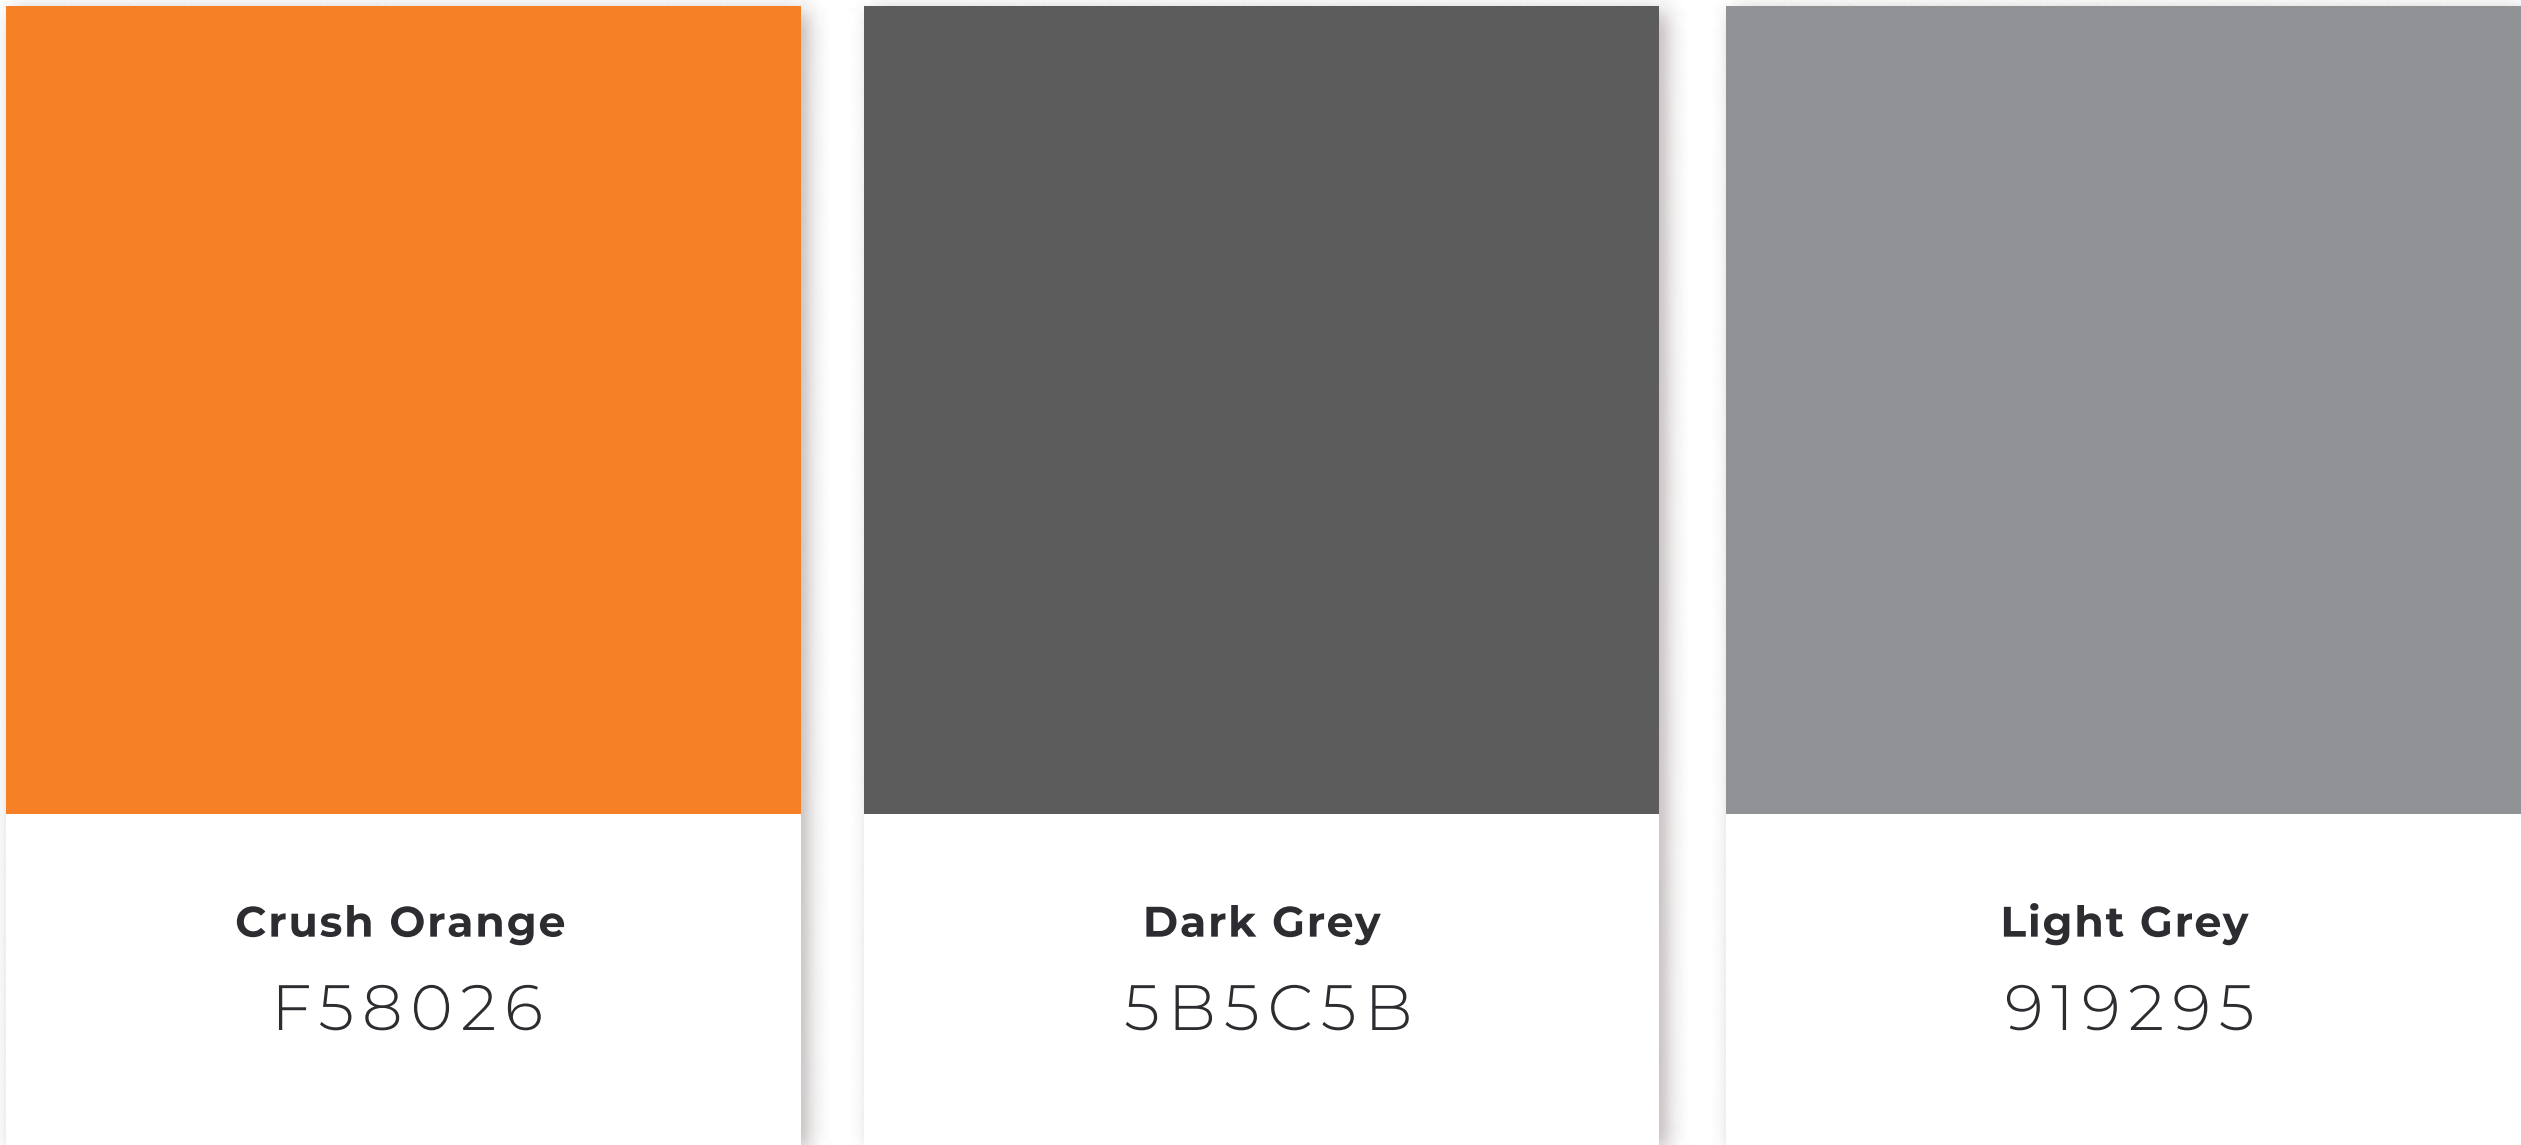

CREATIVITY

SECURITY

HAPPINESS

ENERGY

Primary Colors

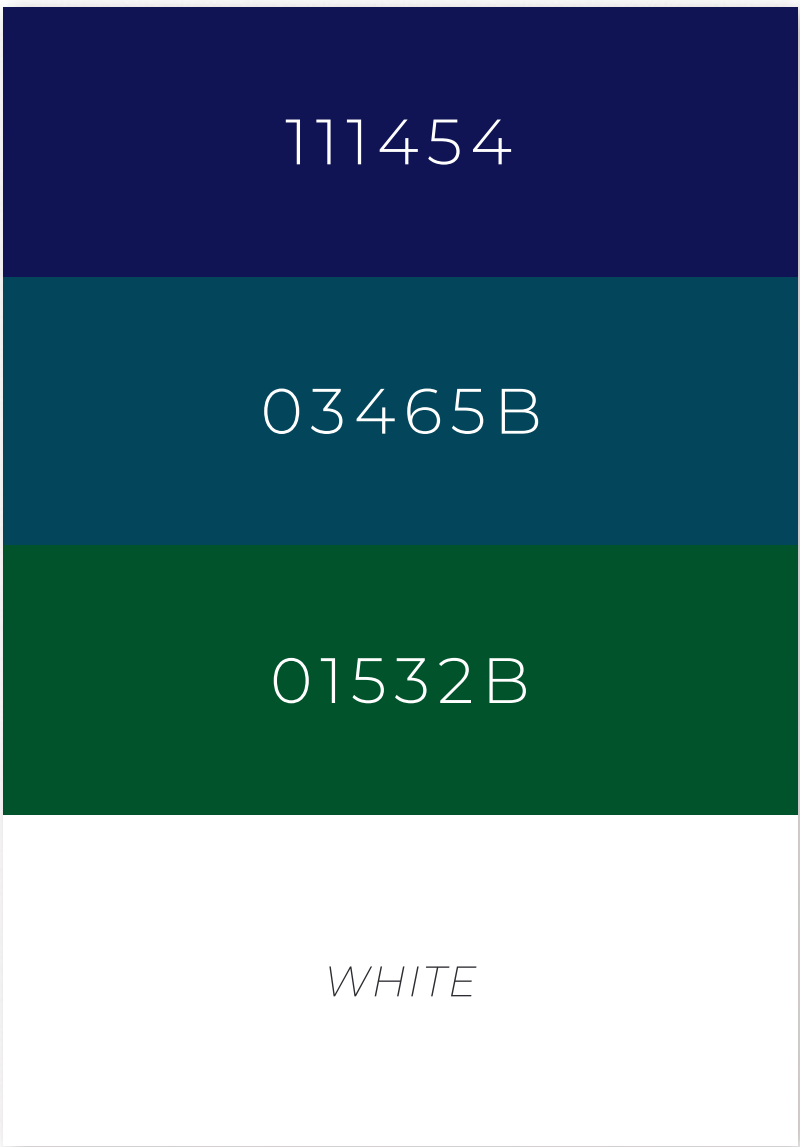

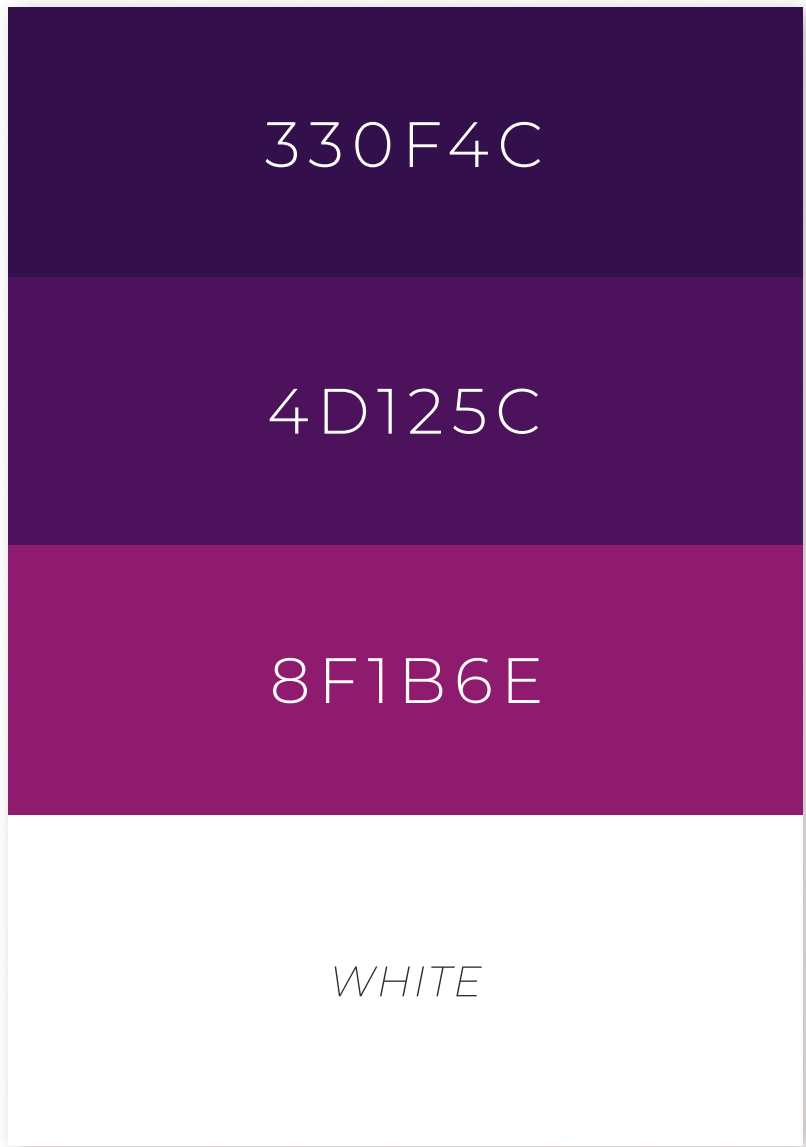

These colors together symbolize professionalism, creativity, and energy. Dark grey and light grey provide a sleek, modern foundation, while orange adds a vibrant, dynamic touch. This combination reflects the agency's balance of innovation and professionalism in their design work.

Secondary Colors

Our main color have different shades to create depth and contrast in their designs.

Dark grey adds a strong, professional tone, light grey provides a neutral and balanced background, and orange injects energy and vibrancy. The varied shades allow for a flexible and dynamic visual identity that can adapt to different design needs while maintaining a cohesive and recognizable brand.

Alternate Uses

Each primary color is accompanied by two shades that allow for versatility in application. These are to be used in situations when added contrast is needed.

In most situations is recommended to use the main colors, but you can always have the possibility to change shades to provide better contrast or add differentiations between elements.

Image Guidelines

Images for Crush Interactive should always transmit happy clients, friendliness, good vibes and personal lifestyle of the people from the company. This can create a sense of closeness to the people seeing social media.

Original Image

Crush Interactive Image

As Crush Interactive Main color is Orange, images should always transmit warm effects, they use the same color palette, filtering images keeping original colors but adding warmer temperature tones to make them all aligned.

If we want to add some interesting touches to our images you should use one of our main effects:

***Overlapping**, this mix text with the image below blending it as if they were on the same frame*

Another one of the effects we use is **B&W + Orange effect**: If you have an image and you want to highlight some specific part of the image, we turn the image into B&W and paint with orange only the part we are interested in highlighting

11.

Brand Elements

Gradients

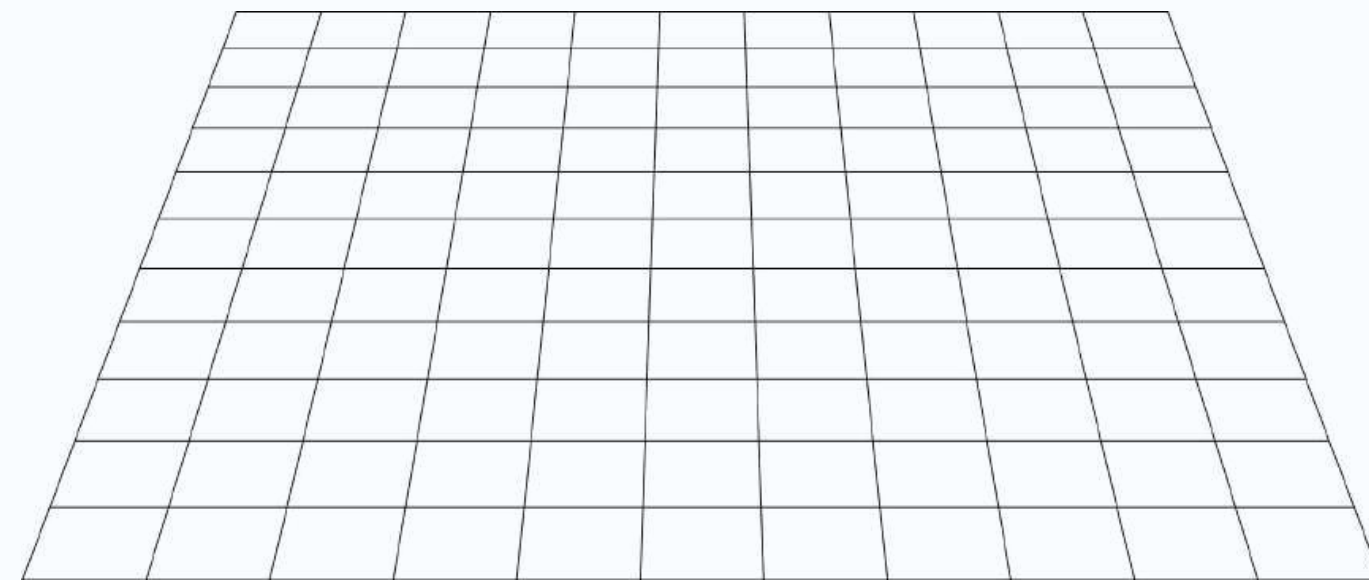

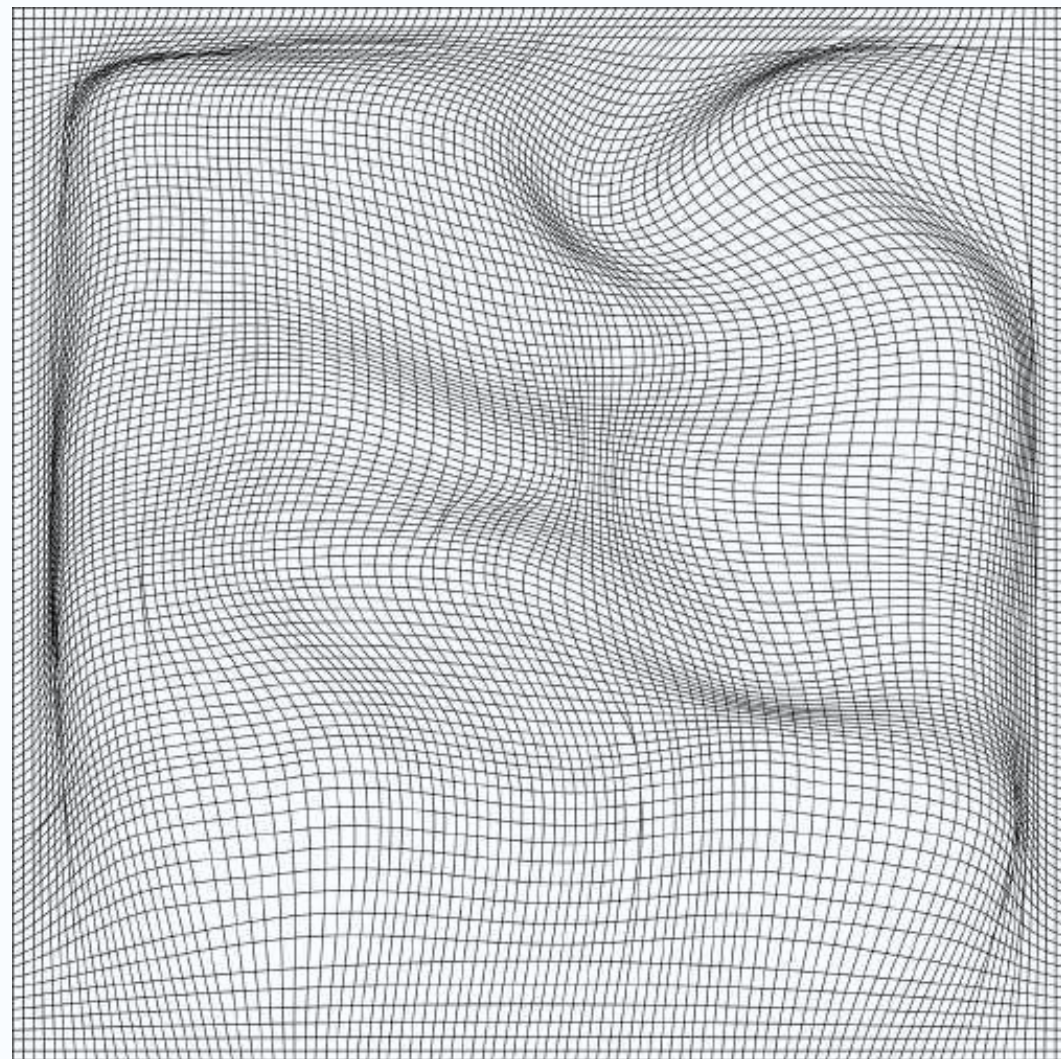

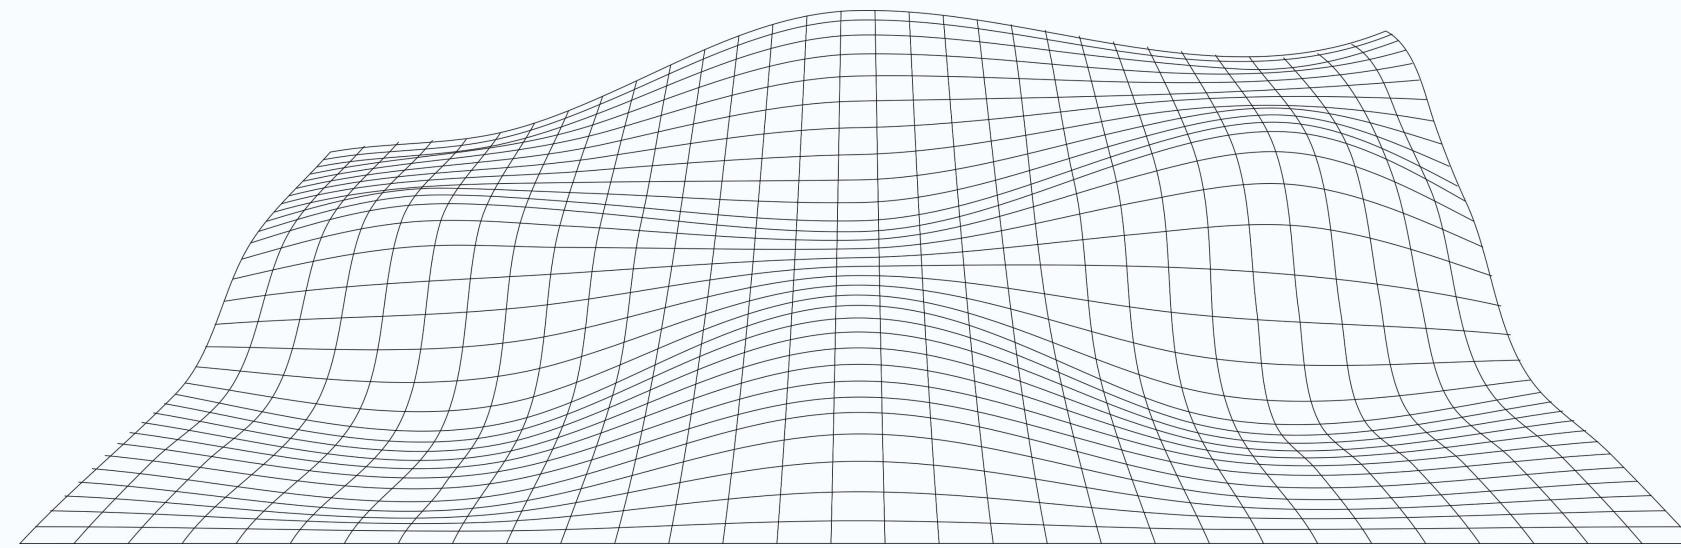

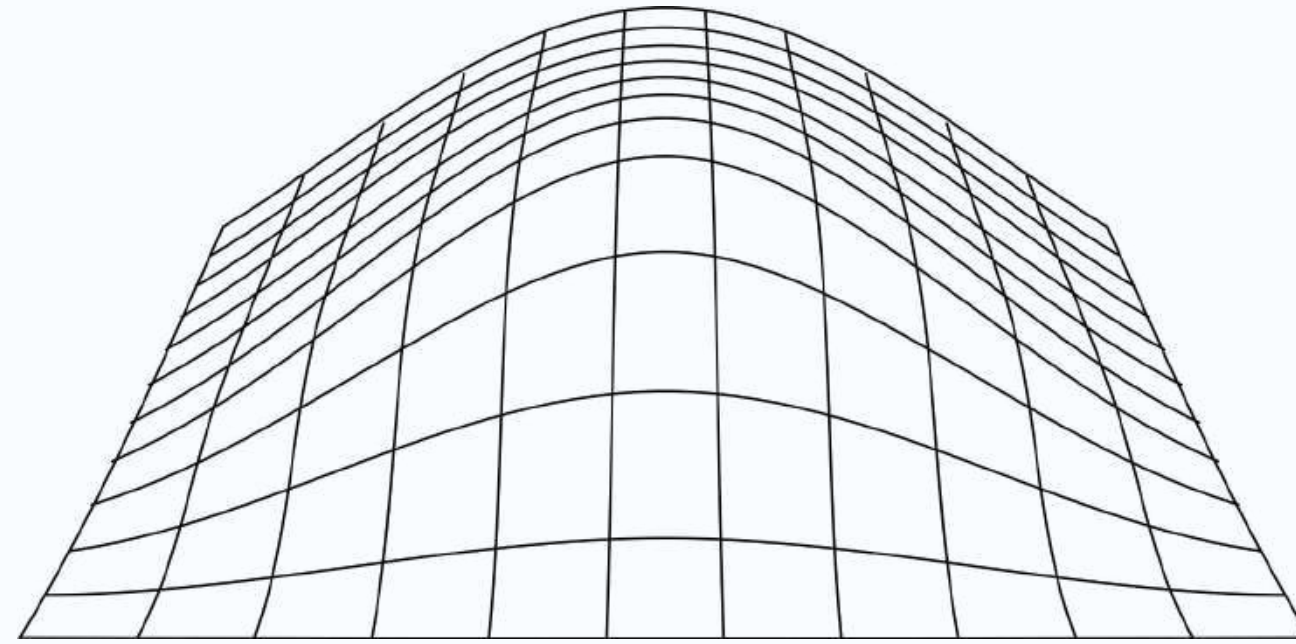

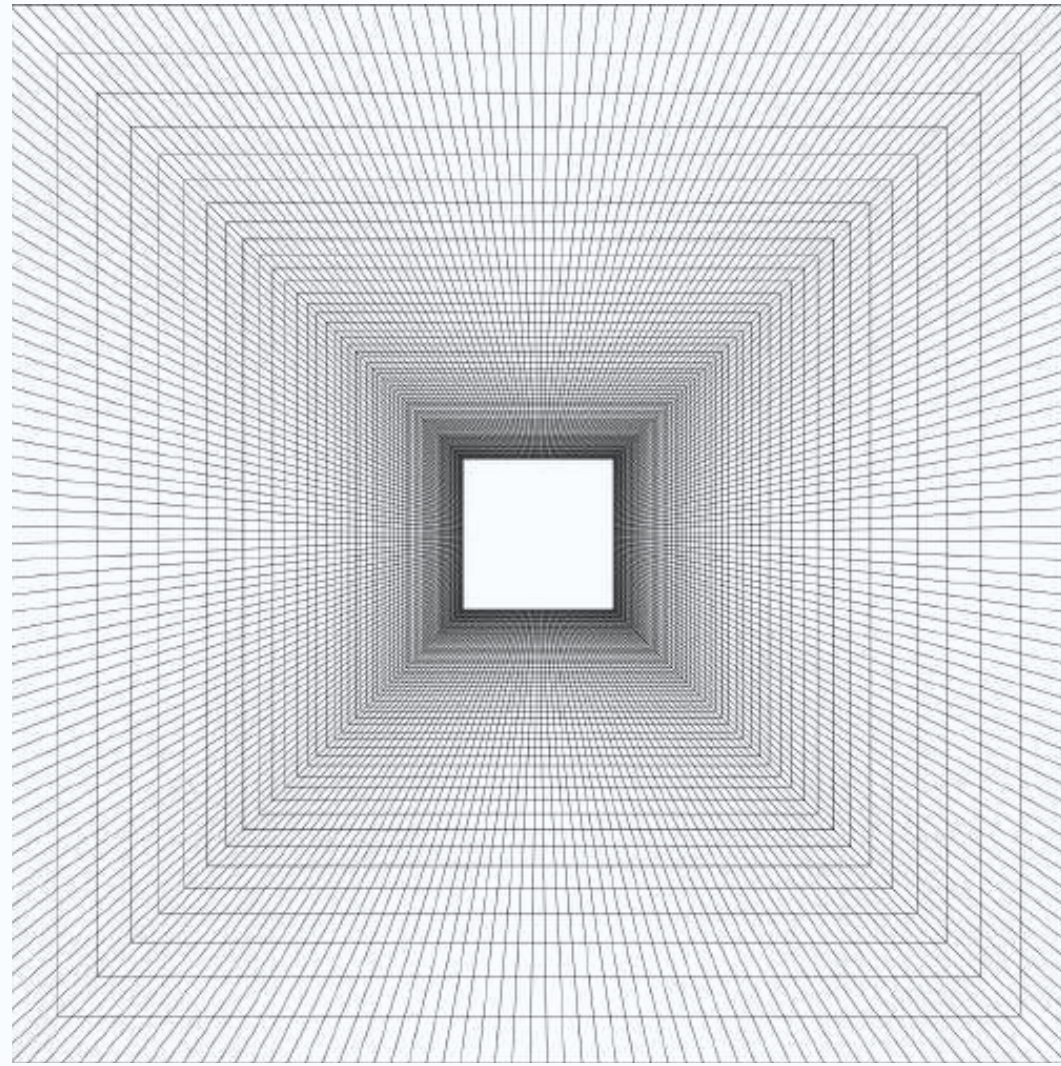

Gradient Backgrounds are used as base for designing elements of impact like Heros, Banners or Social Media Elements.

This simple detail adds a lot of personality to the brand.

MEET YOUR NEW WEB AGENCY

Real Results: When you speak to the right audience in the right tone, positive results are inevitable.

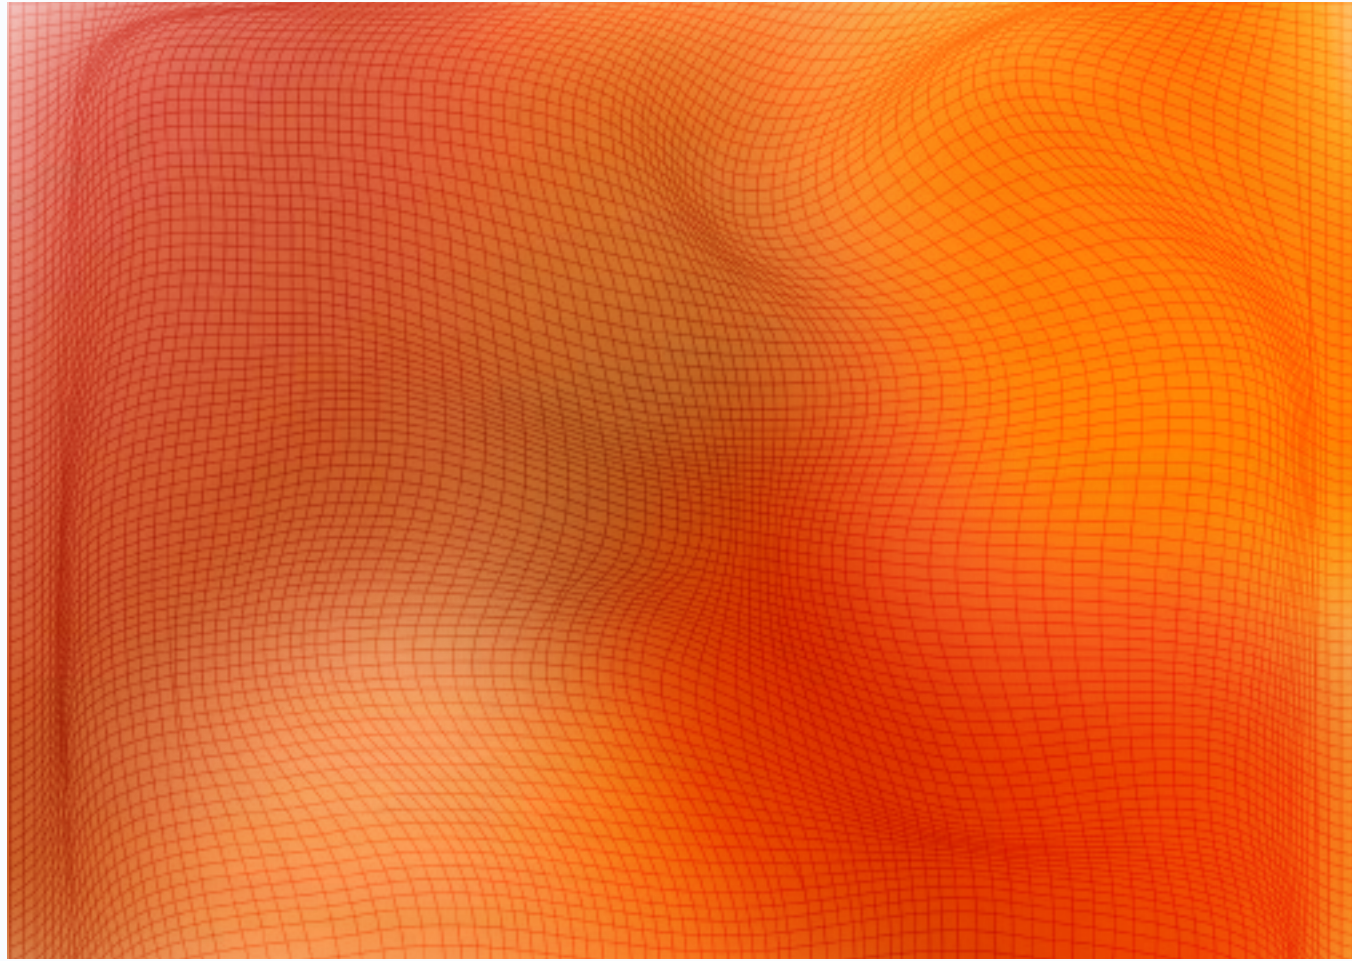

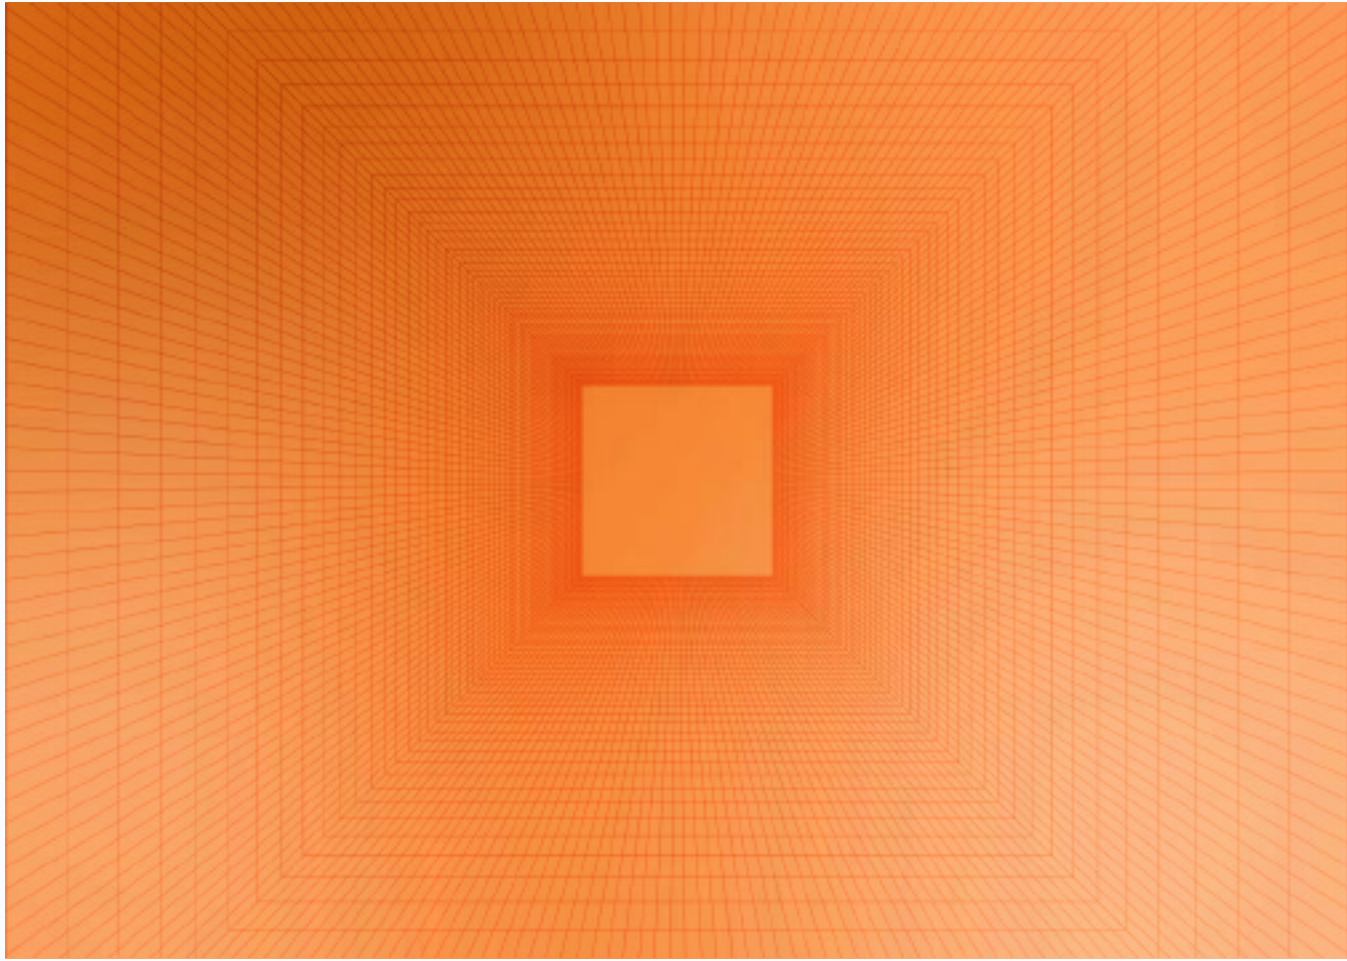

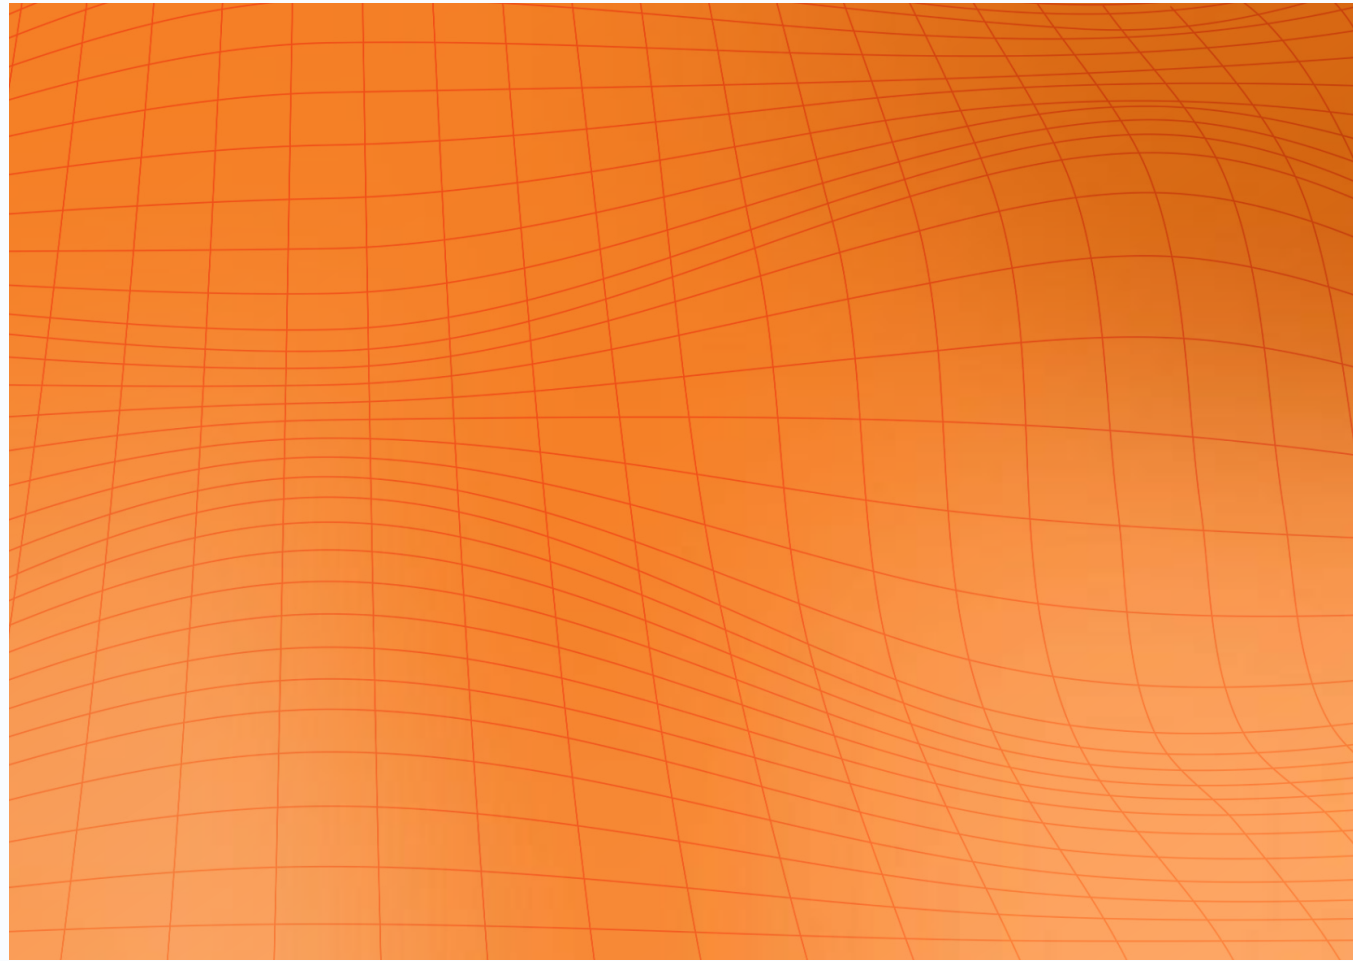

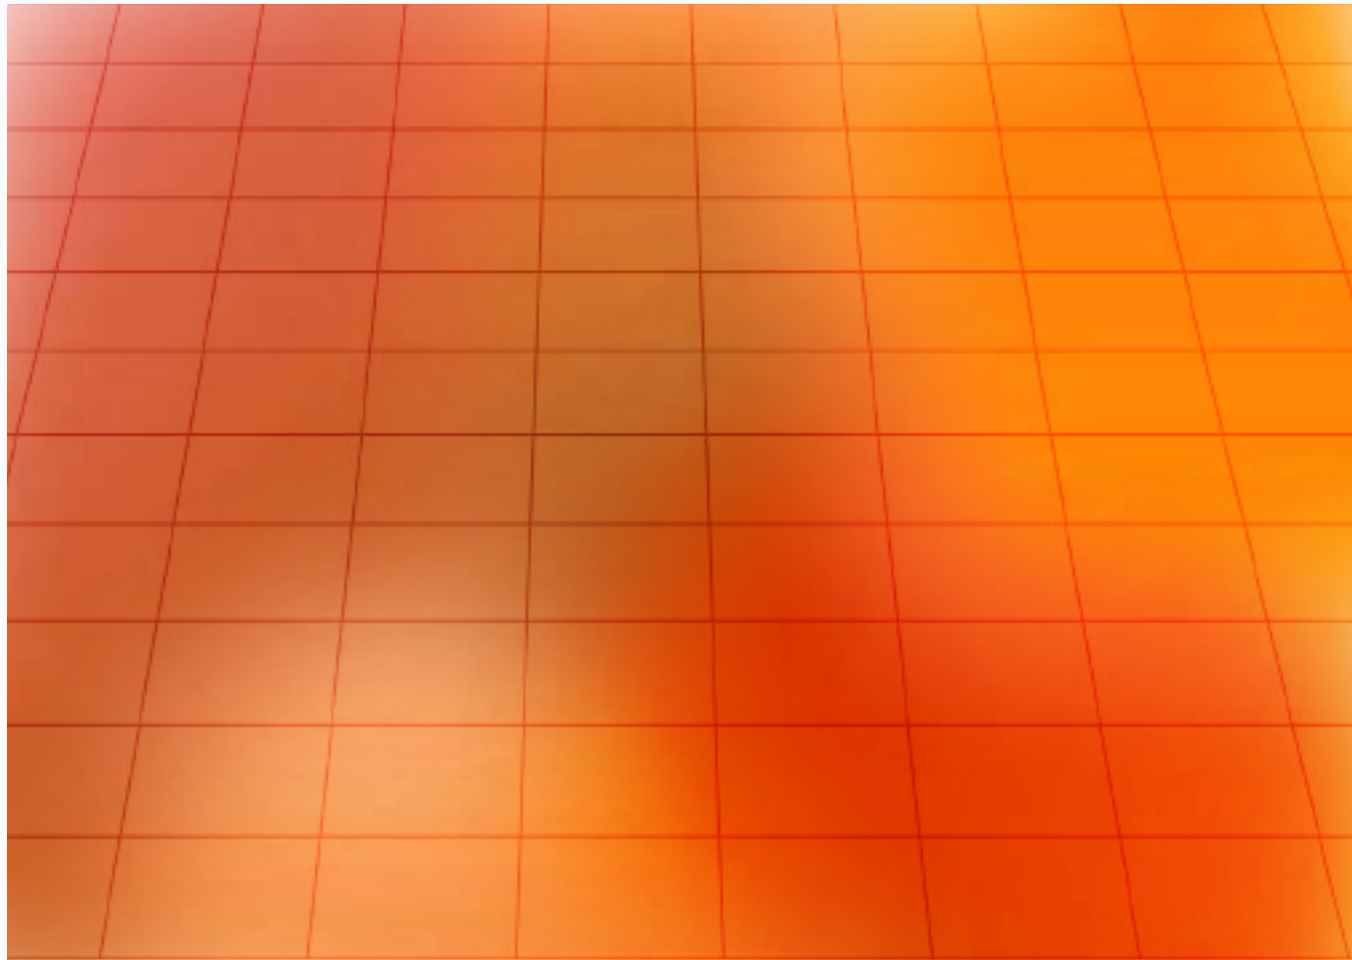

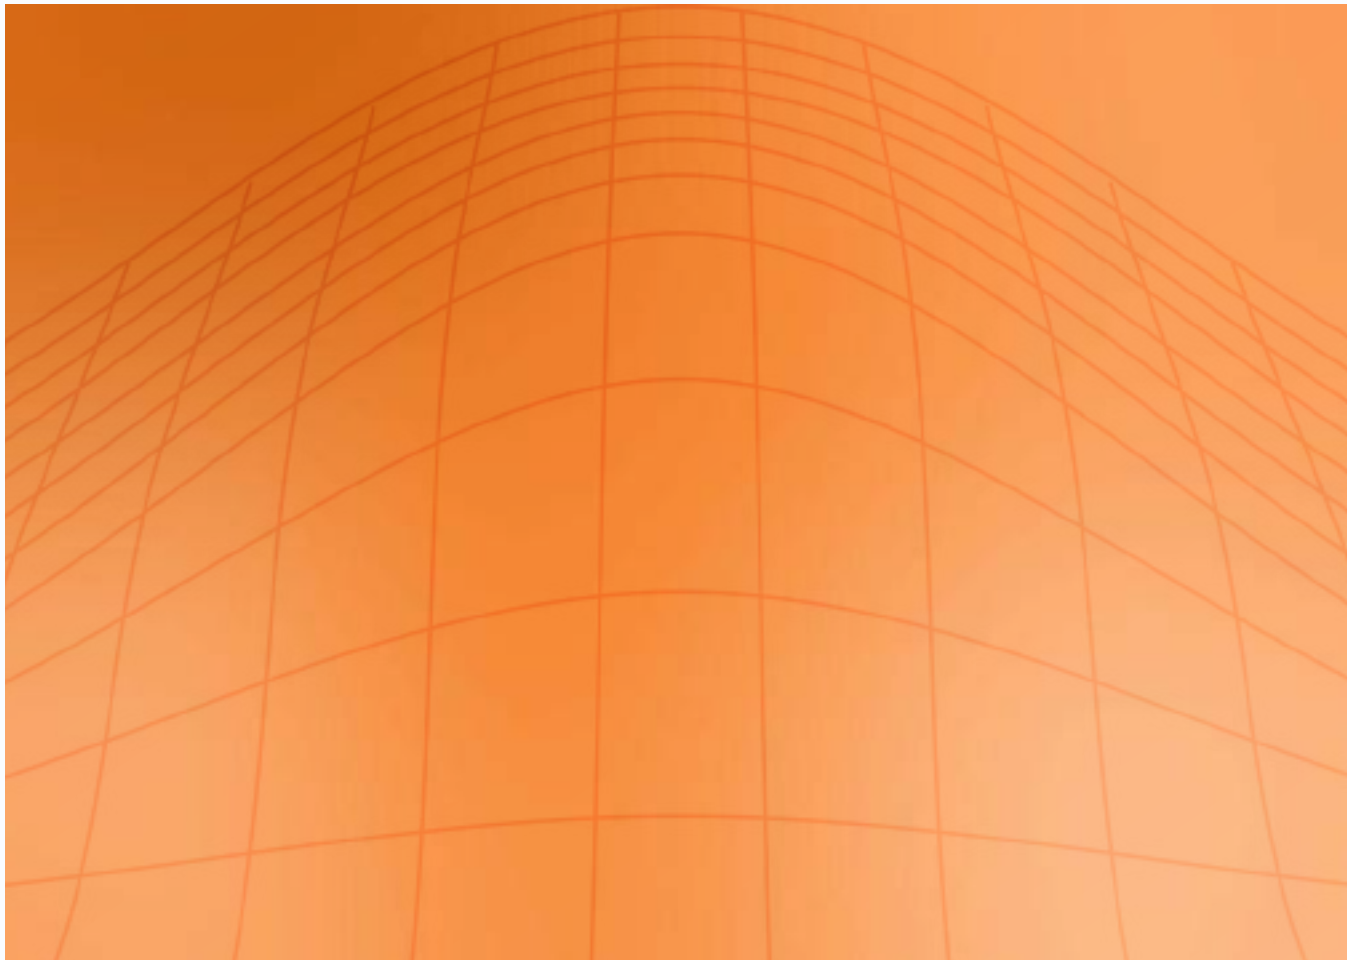

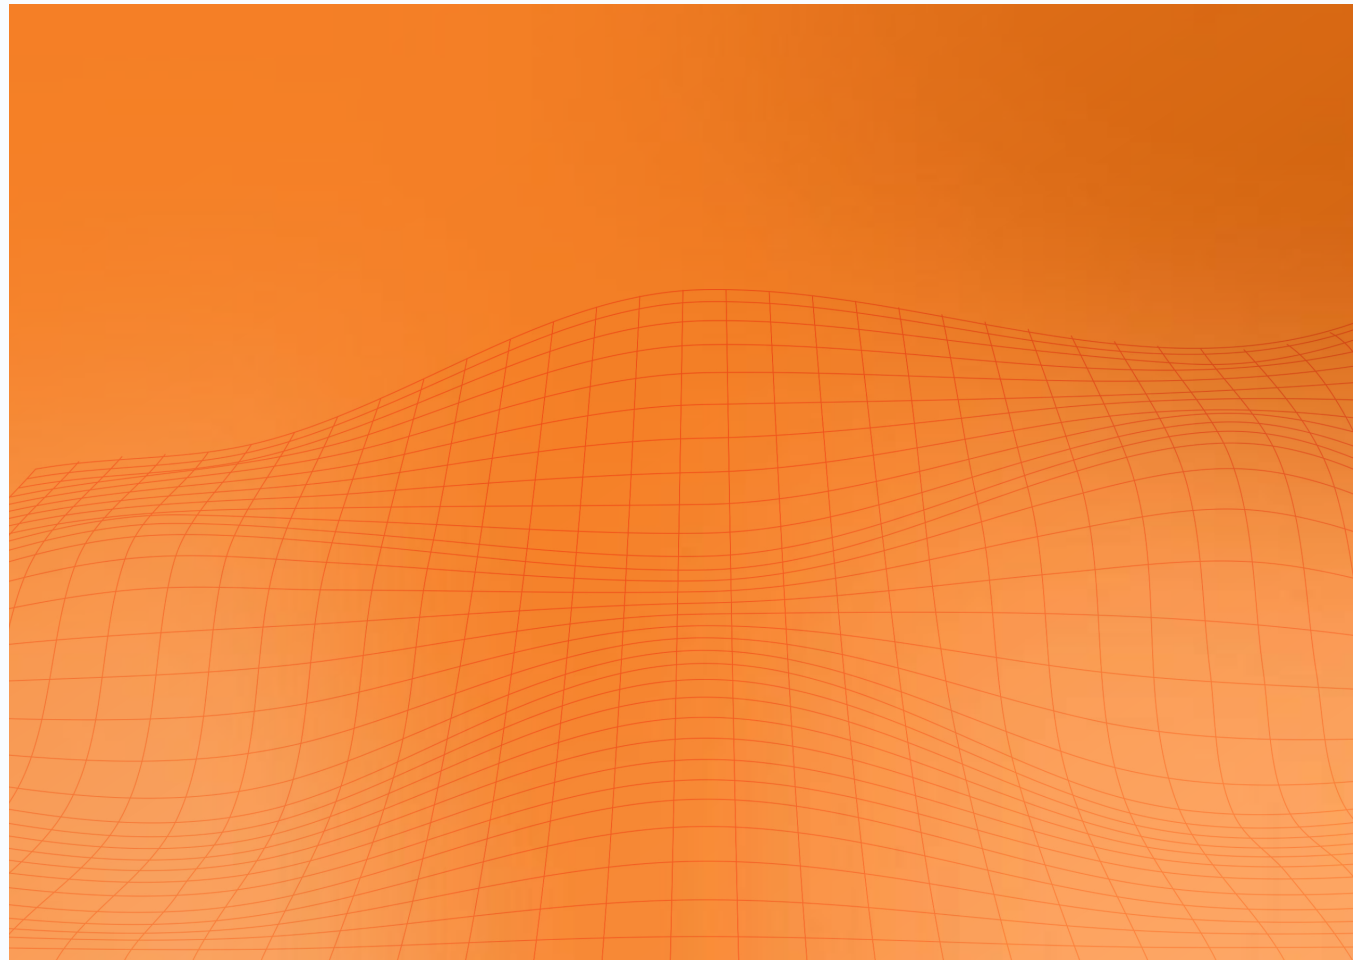

Line Masks

Line masks are for using them in the background of creating deepness on the area that you are using the element.

This is mostly used in headers, banners and social media elements.

Line Masks Applications

Doodles are used to add a touch of creative elements, regarding the fact that even tho we work with web design we love to dedicate our time to each project and this can be creating things in the most traditional ways, witch can even start with han drawn designs.

Meet
Your New
Web Agency!

Real Results: When you speak to the right audience in the right tone, positive results are inevitable.

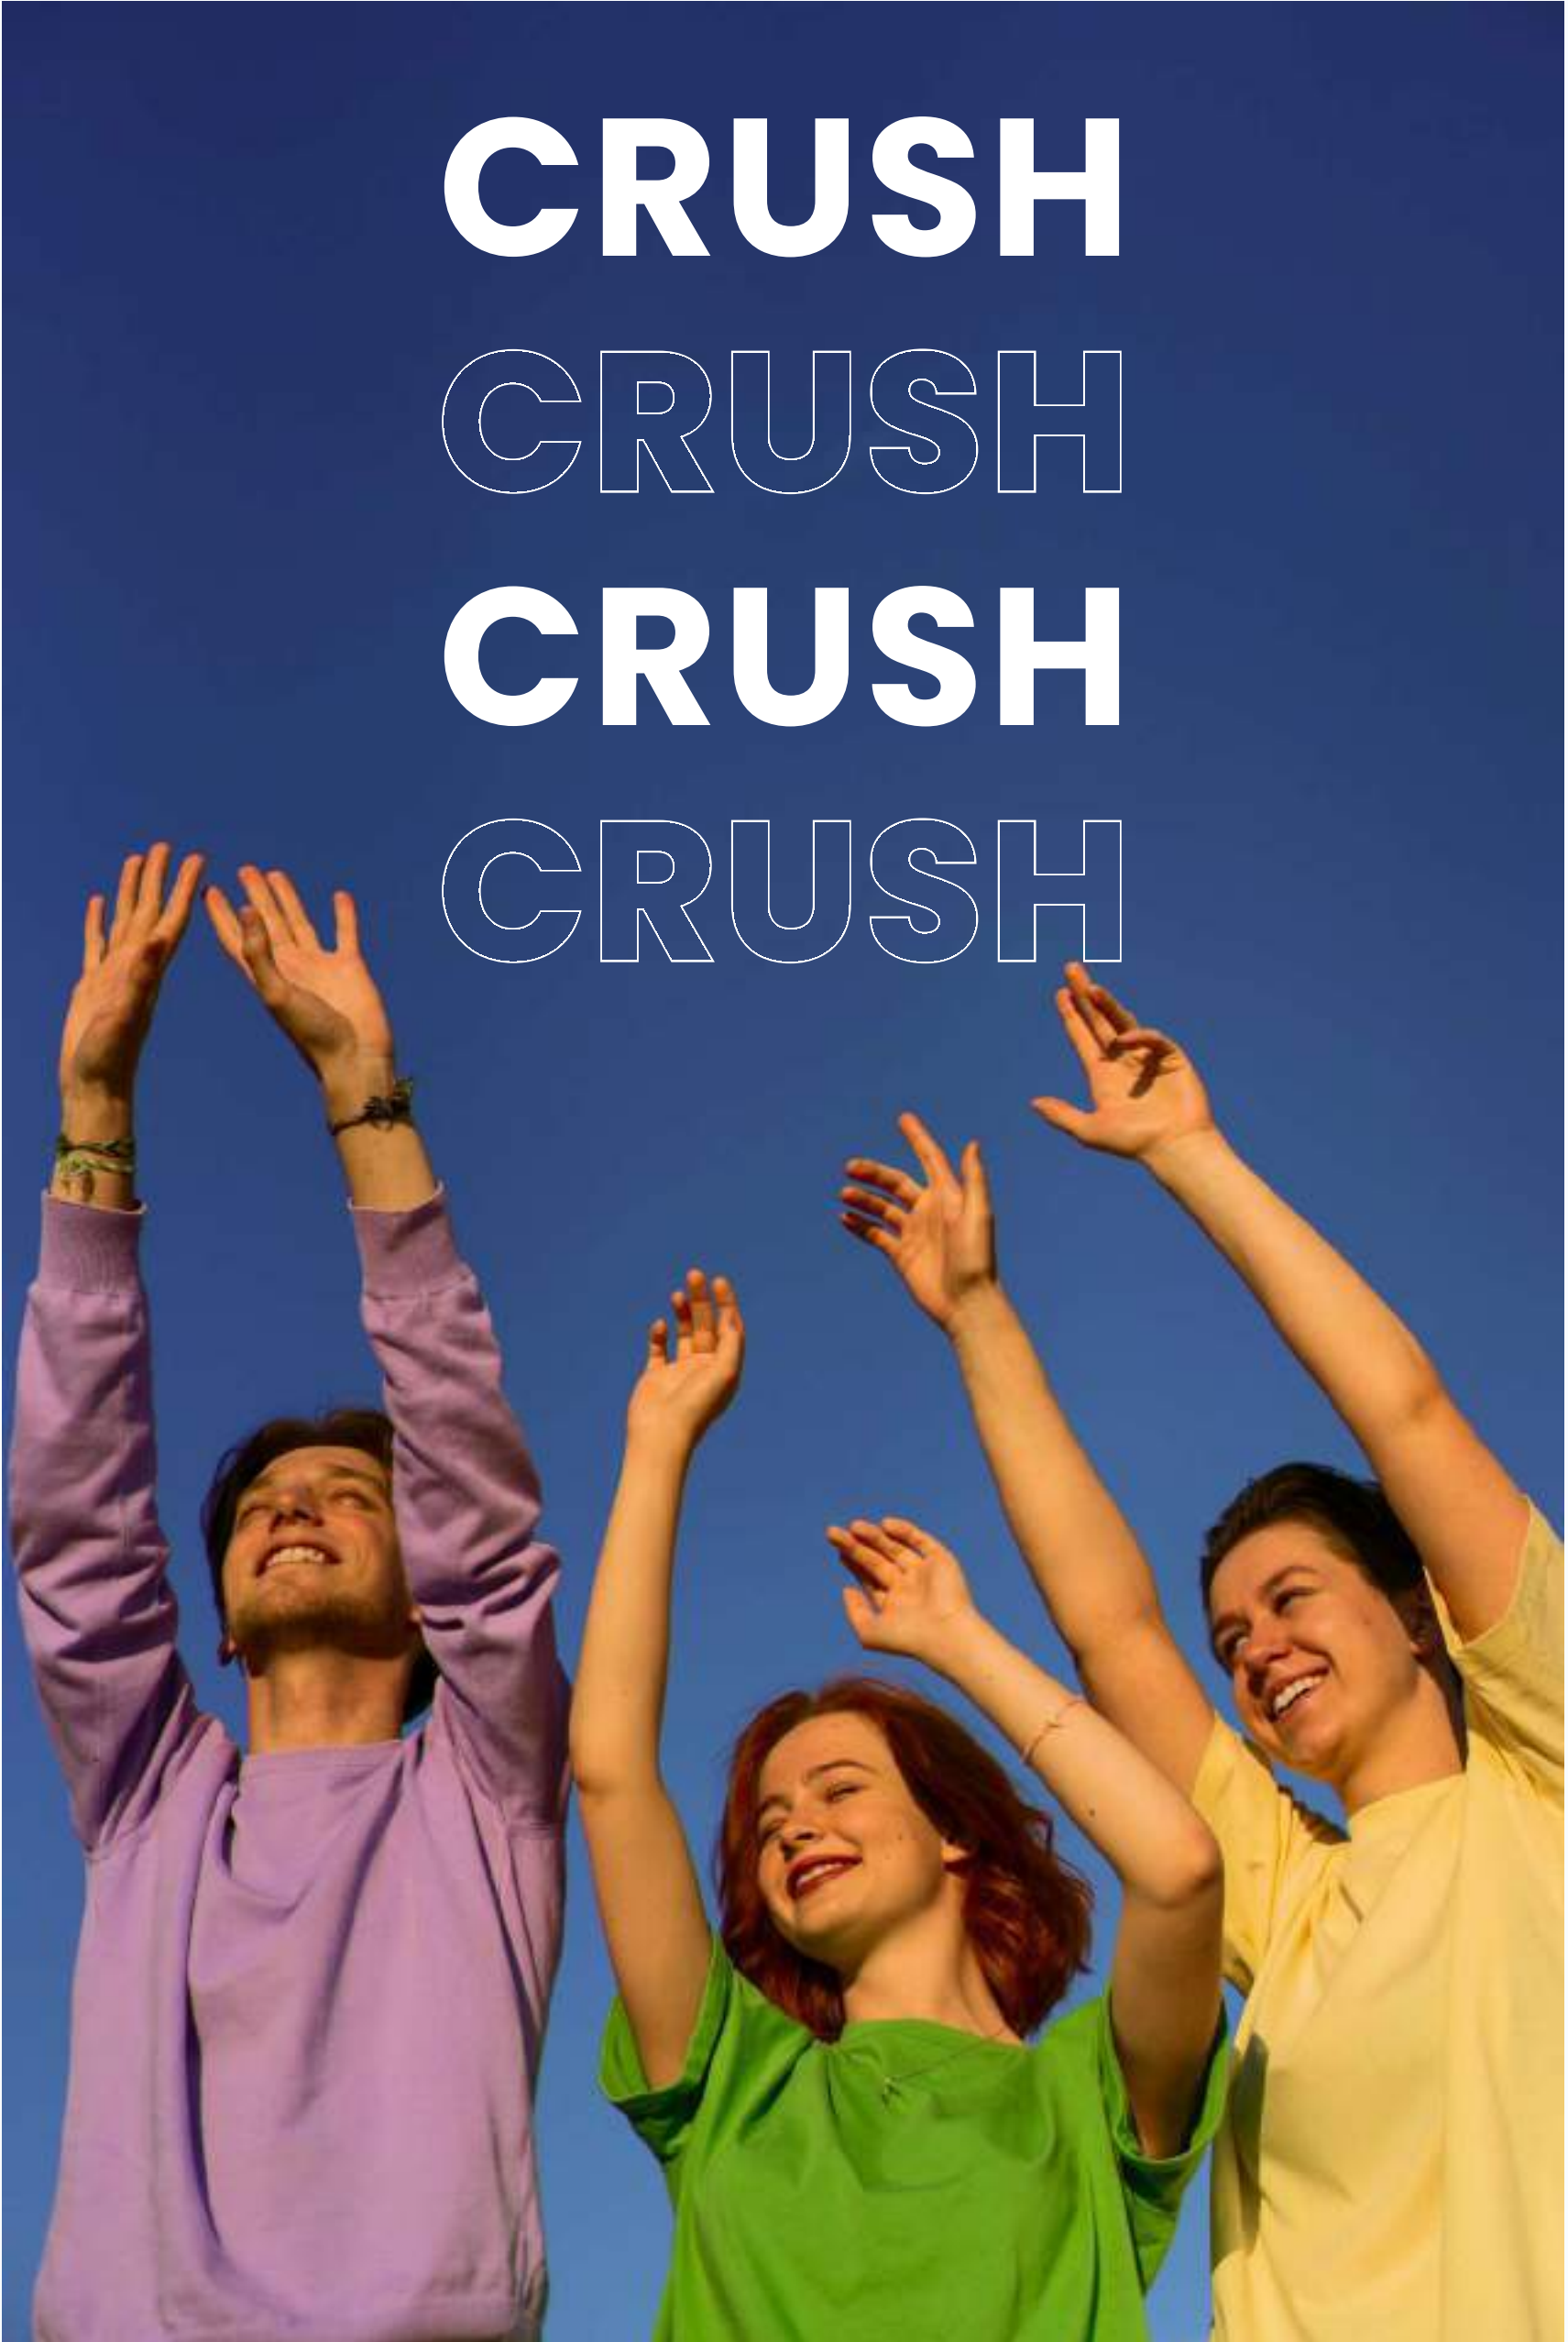

STROKE

TEXT

CRUSH

INTERACTIVE

Mixing stroke text with filled text is another design element we use to take some weight on the text and find balance in the text we are applying this. This is a small detail that can create a sign of our brand.

12.

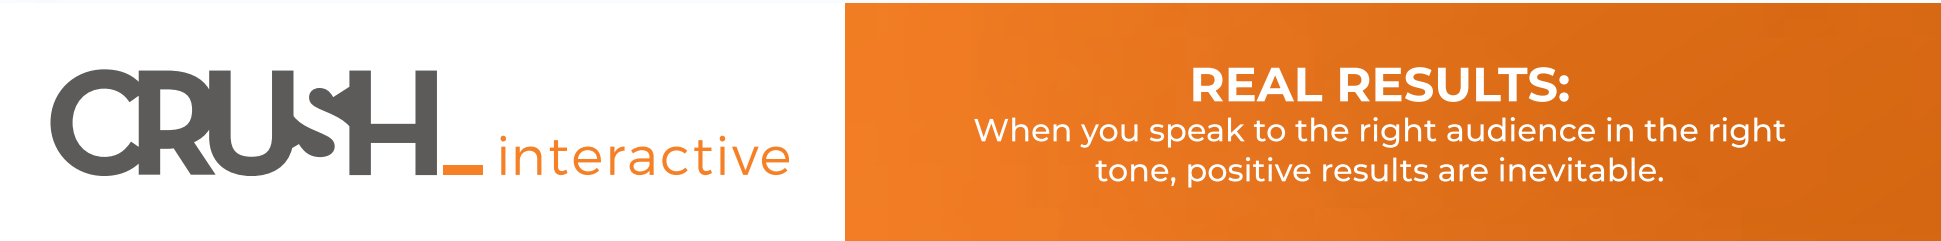

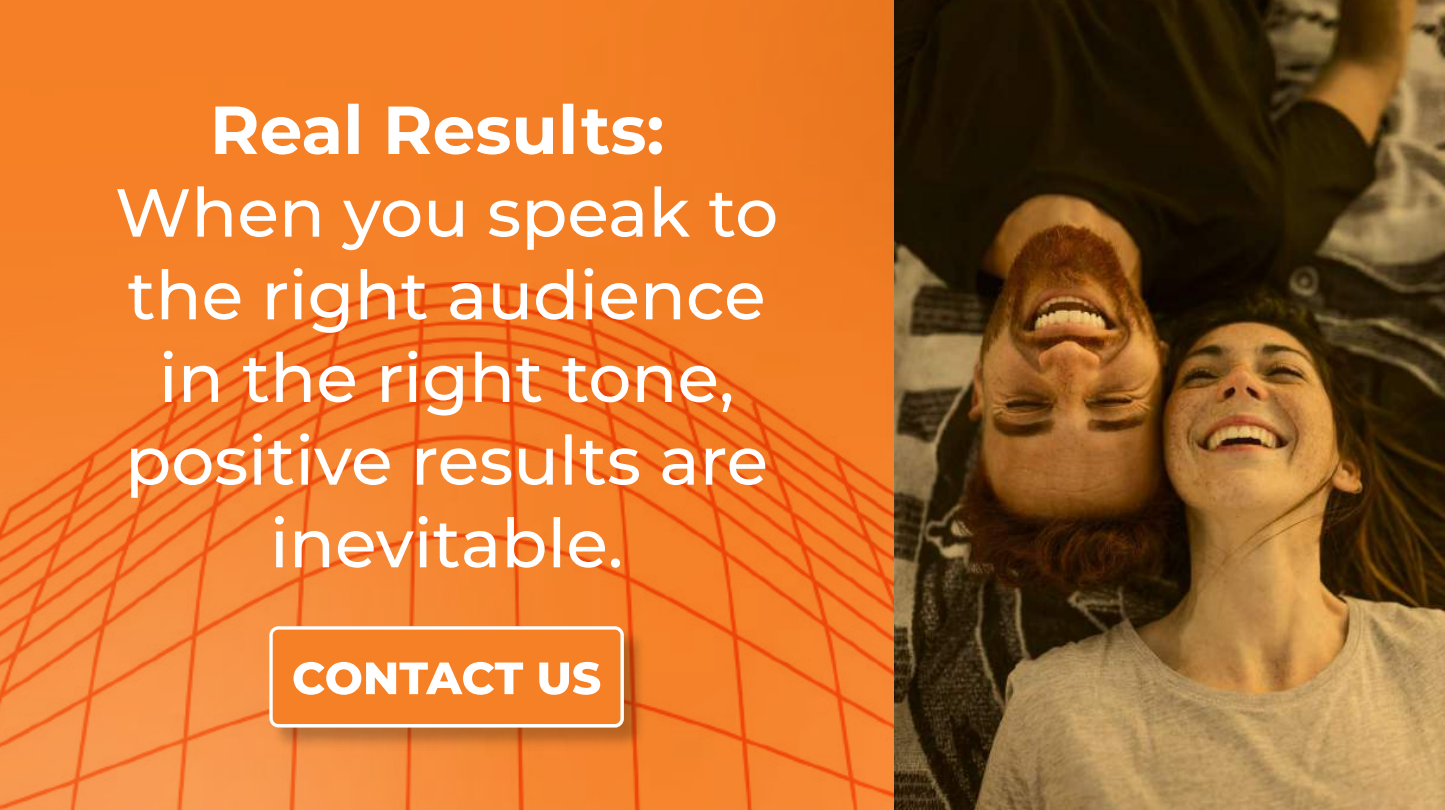

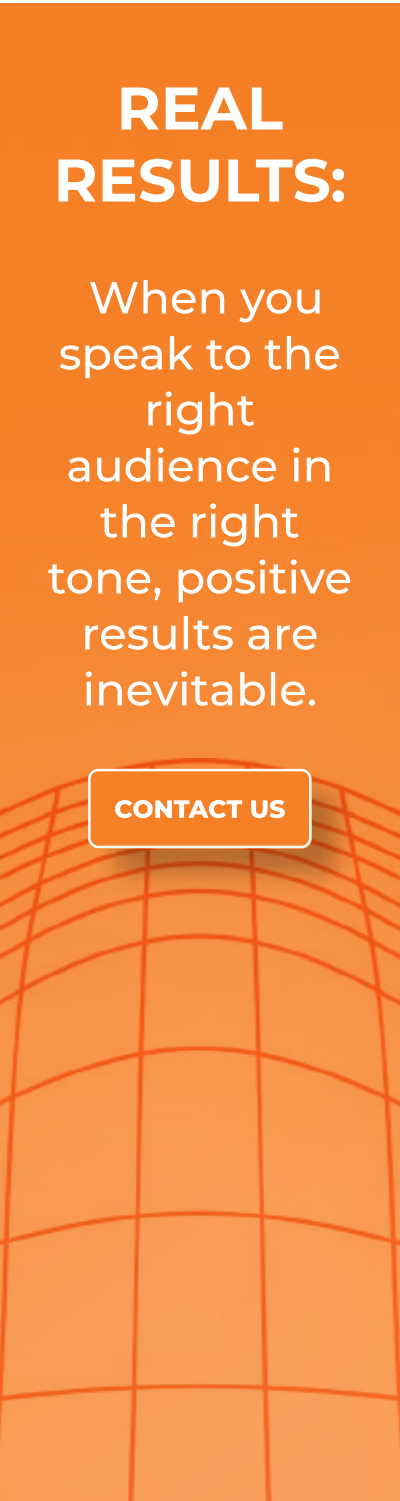

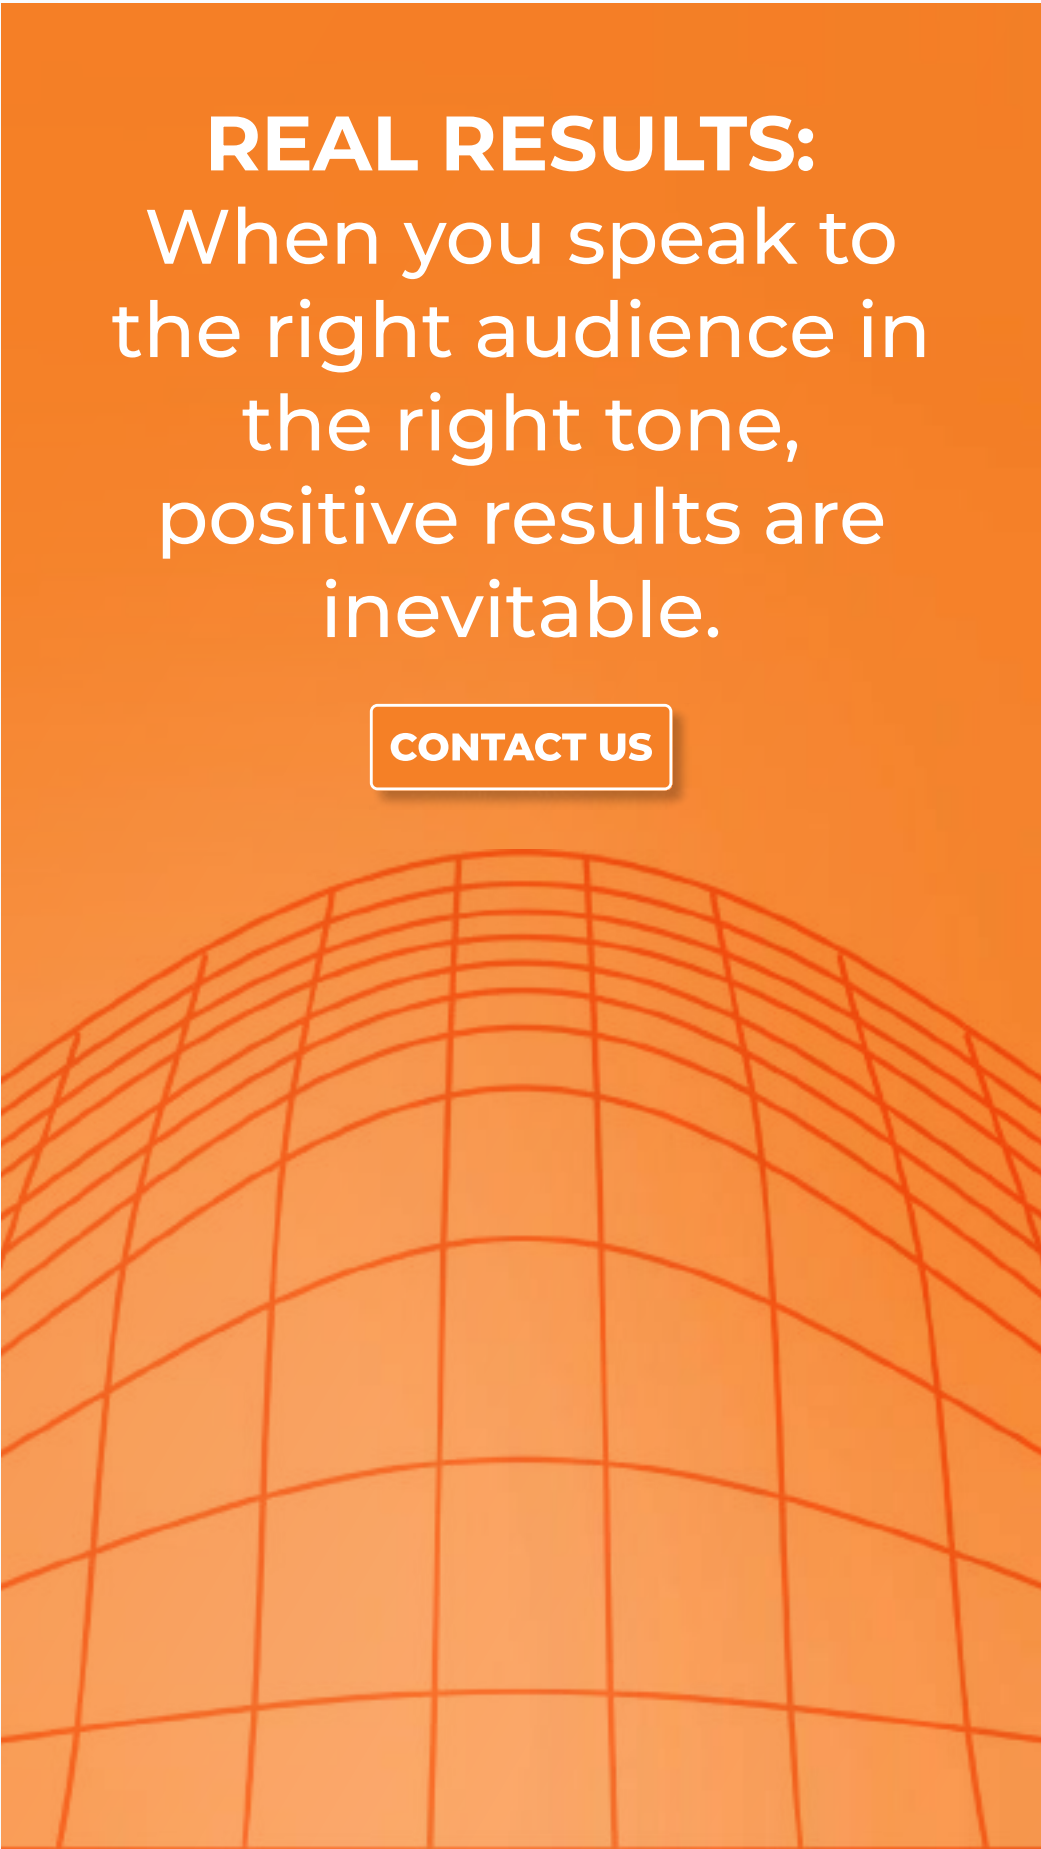

Social Media

Covers on Social Media can be the first glimpse a possible client to our world. Our profile picture is always going to be our logo so here is where we get to show a little bit of what we want to transmit

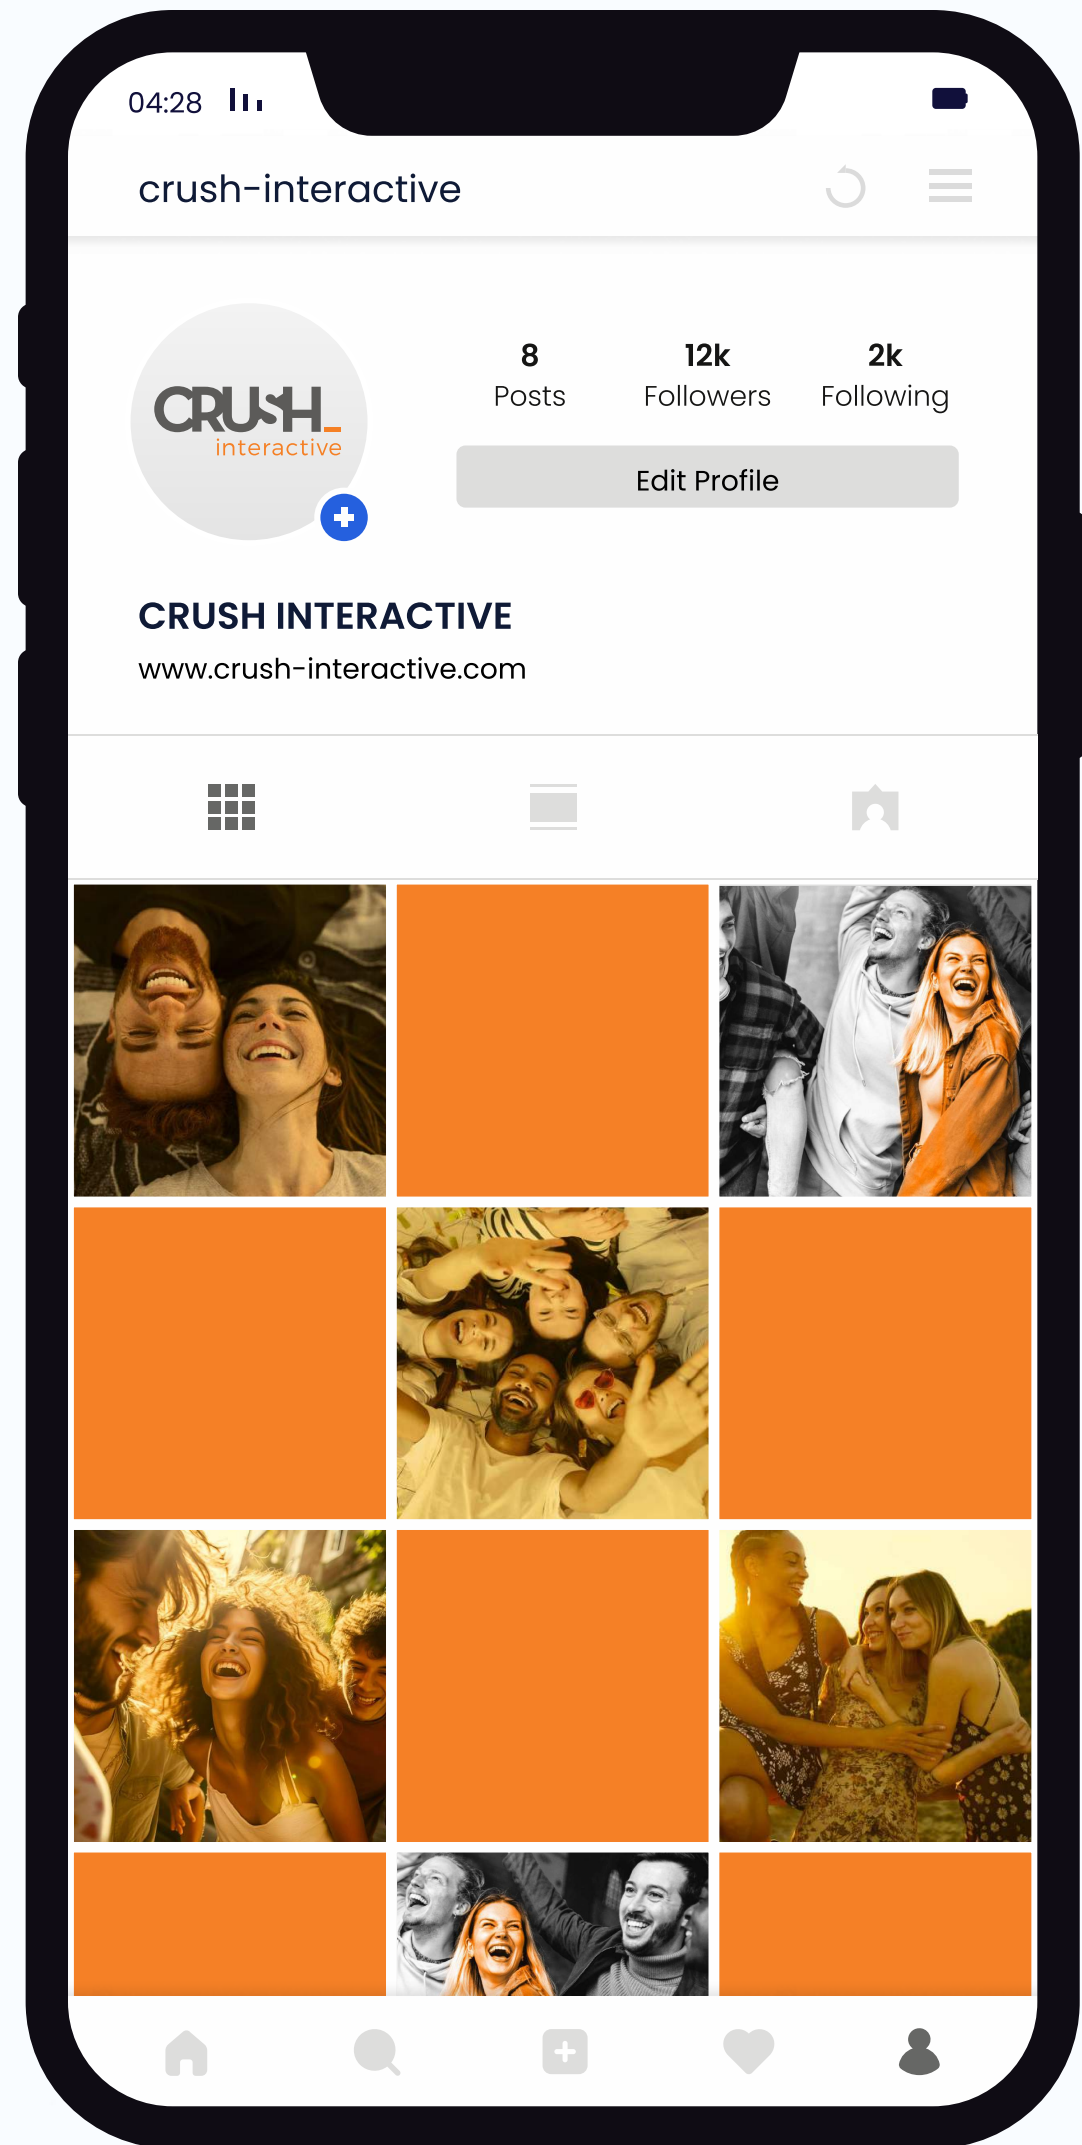

- Social Media with covers:*
- Facebook
 - LinkedIn
 - X

DOWNLOAD COVERS

Banners are mostly to advertise our products on Paid or Organic Ads, it also works for adding some important information on our website.

DOWNLOAD BANNERS

*Our **social media grid** is divided in to different sections to provide different types of content for our users to find what they are interested in, this is mixed by organic and non organic content.*

- **Portfolio** --> Our projects
- **Lifestyle** --> Conferences, meet the team etc
- **Design content** --> Tips, recommendations etc

SOCIAL MEDIA STRATEGY

13.

Applications

[CLICK HERE FOR TEMPLATE](#)

*When we share a **briefing or a proposal to clients**, it should follow our SOPs and our brand guidelines, this is why we created documentation templates, for them to be used on every situation that may need digital or printed documents.*

*Also documentation works for **internal communication** branding each team member*

*Merch works for conferences or fairs where you can share elements like seen on the left for possible clients to remember our brand with useful and **well designed products**.*

*Merch also works for **internal communication**.*

Our goal for the web design is to *transmit our results and our main values “we deliver”*

The web contains clear content making the client trust us with displaying our *Portfolio* and delivering our *success and experience threw-out the years.*

IMPROVEMENT PROPOSAL

Presentations should always follow a template to use them in every occasion following the SOPs, our main focus on presentations is to deliver presentations in the right way, so design should be **clear**, **minimal** and **clean**
